Hi all,

I wanted to let you know that 4 tier I bait stations were registered for Reckitt Benckiser on 9/3/2010. They are diphacinone products for use against house mice. Rusty, I updated the table (the one you had in our meeting about the website). The registration numbers are 3282-100, -101, -102, and -103. I'm looking at some Bell tier one applications also and will update ya'll when those are registered.

Thanks,
Jen
